

The Grand Rounds tradition is unique to the medical profession with deep historical roots. Today, it provides an opportunity for all practitioners, from the most junior trainee to the most senior diagnostician, to learn and exchange ideas in a common forum.

Yale Diagnostic Radiology is pleased to carry on this tradition with a wonderful array of important topics addressed by true experts in our discipline.

Please join us for our Grand Rounds series of lectures this season.

*James Brink, M.D.
Chairman
Diagnostic Radiology*

This program has been planned and implemented in accordance with the Essentials and Standards of the Accreditation Council for Continuing Medical Education through the Yale School of Medicine. YSM is accredited by the ACGME to sponsor continuing medical education for physicians.

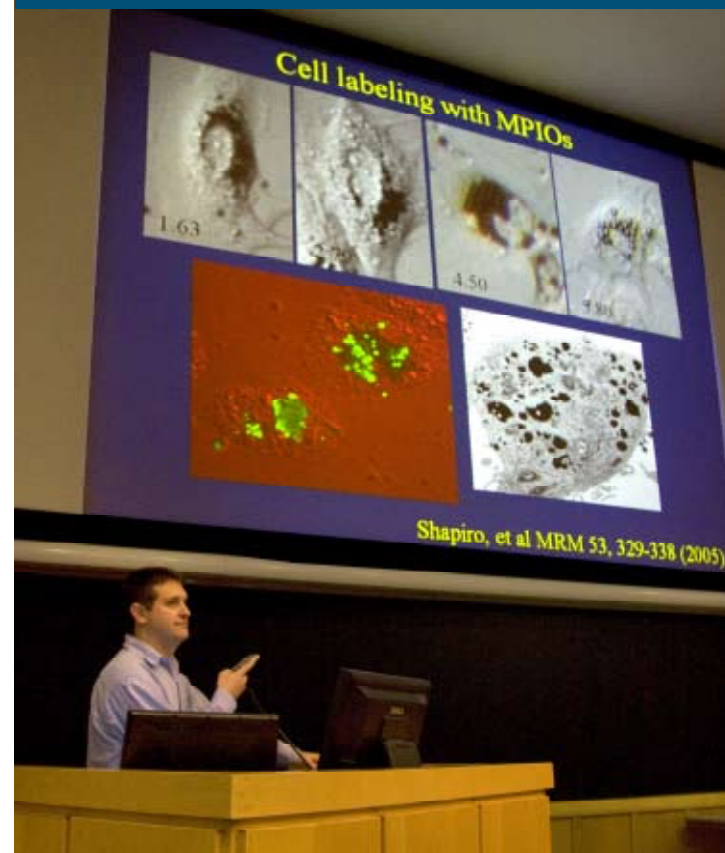

The Yale University School of Medicine designates this educational activity for one hour in Category I credit towards the AMA Physicians Recognition Award. Each physician should claim only those hours of credit that he/she actually spent in the educational activity.

All faculty participating in CME activities are expected to disclose to the audience any real or apparent commercial financial affiliations related to the content of their presentations and materials. In addition, faculty are expected to disclose any intent to discuss the off-label uses of any drugs or devices.

on the right of the home page*

Yale Diagnostic Radiology Grand Rounds Calendar

October - December 2009 Thursdays from 12:30 - 1:30 PM
Anlyan Center Auditorium - TAC N107 - 300 Congress Avenue

OCTOBER 22, 2009

"Financially Self-interested Referral"

Jonathan H. Sunshine, MD, PhD

Senior Director for Research, American College of Radiology, Adjunct Professor, Yale University School of Medicine - New Haven, CT

Objectives of the Presentation:

- Identify objections to the notion that financially self-interested referrals (FSIR) are associated with elevated utilization of imaging.
- Present findings that studies have not convincingly shown that FSIR leads to increased imaging.
- Present findings that higher imaging rates with FSIR provide benefits in clinical &/or financial outcomes.

NOVEMBER 5, 2009

*"CHALLENGES IN EMERGENCY RADIOLOGY:
IMAGING THE BARIATRIC PATIENT"*

Syed A.J. Bokhari, MB, BS-MD

Associate Professor, Residency Program Director, ED Section Chief and Co-Director, Teleradiology, Diagnostic Radiology, Yale University School of Medicine - New Haven, CT

Objectives of the Presentation:

- Realize the scope of the problem.
- Understand the imaging choices available for the bariatric patient.
- Learn methods for optimizing imaging of bariatric patients.

DECEMBER 17, 2009

"QUANTITATIVE BIOMARKERS OF FATTY LIVER DISEASE"

Scott Reeder, MD, PhD

Assistant Professor, Radiology, Chief of MRI & Cardiovascular Imaging, Depts of Radiology, Medical Physics, Biomedical Engineering & Medicine, University of Wisconsin - Madison, WI

Objectives of the Presentation:

- Understand the epidemiology of fatty liver disease.
- Understand the basic principles of measuring disease features of fatty liver disease with MRI.
- Understand the potential of new biomarkers for disease detection, prevention and treatment monitoring.
